COVIDIEN

COVIDIEN: Your solution for cardiology monitoring supplies.

WHY COVIDIEN CARDIOLOGY MONITORING SUPPLIES?

Covidien is a market leader in monitoring, diagnostic, defibrillation and neonatal electrodes. With over 20 years of hydrogel experience, Covidien's gel formulas provide accurate traces. In addition, the lower chloride content in Covidien's hydrogels help to minimize skin irritation. With products varying in size, shape and substrate, Covidien has an electrode to address all clinical needs.

For over 50 years Covidien has also been a market leader in the recording chart paper market. Rounding out the complete cardiology solution is our extensive offering of cables and leadwires.

From patient to monitor you only need one supplier for your Cardiology Monitoring supplies: Covidien.

Covidien has a direct U.S. sales force of over 150 service-driven professionals focused on Cardiology monitoring supplies in both the Acute Care and Alternate Site markets. These individuals are located in every major metropolitan area of the country to support our customer's needs. In addition, we have product distribution centers strategically located throughout the U.S. in order to assure our customers of the shortest transit time possible when placing orders. Our products are also available through all major medical/surgical distributors.

A healthcare professional, likely a nurse or technician, is shown from the chest down, wearing blue scrubs and white gloves. She is focused on applying small, blue, rectangular electronic sensors to the abdomen of a male patient lying on a table. Several sensors are already attached to the patient's skin, each connected by a thin wire to a small black device. The patient's head is visible on the right side of the frame, and he appears to be resting. The background is a plain, light-colored wall. The word "Diagnostic" is overlaid in white text on a semi-transparent dark blue rectangular background in the upper right portion of the image.

Diagnostic

COVIDIEN OFFERS A VARIETY OF TAB ELECTRODE DESIGNS TO ACCOMMODATE VIRTUALLY ALL RESTING ECG APPLICATIONS.

- Conductive adhesive hydrogel for excellent adhesion and clear, reliable tracings
- Silver/Silver Chloride (Ag/AgCl) sensing system is defibrillation recoverable
- Variety of shapes, sizes and substrates to accommodate different skin types and applications
- Latex free, DEHP free, mercury free

THE #1 RESTING ECG ELECTRODE SOLD IN THE MARKET

5400 Resting ECG Tab

The 5400 sets the industry standard for resting ECG tab electrodes. This tab electrode features our most popular level of adhesion suitable for most diagnostic applications.

Gold 5500 Resting ECG Tab

The 5500 tab electrode features our highest tack adhesive gel providing maximum adhesion.
