For completing consistent & accurate
health screening assessments

Audiometry | Spirometry

Why learn with us?

Amplivox is trusted by many leading occupational health companies and departments in both public and private sectors to provide proven and accredited training schemes.

Developed specifically for occupational health professionals, our audiometry, spirometry and vision screening courses ensure delegates have the necessary skills for a standardised, accurate and consistent approach to health screening.

Our courses

Audiometry courses

We provide a two-day assessed competency course based on a recommended syllabus of the British Society of Audiology (BSA) and the Health & Safety Executive (HSE).

We also offer a one-day refresher course for professionals looking to update their skills and knowledge as required.

Spirometry courses

A practical one-and-a-half-day competency course providing theoretical, practical and interpretational skills in conducting respiratory tests within an occupational health environment.

As well as a one-day refresher course for individuals who require a refresher in all aspects of occupational spirometry measurements and interpretation.

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD).

Audiometry

We have developed a range of accredited occupational audiometry screening courses focused specifically for occupational health and primary care professionals.

Our occupational audiometry courses are based on the recommended syllabus by the British Society of Audiology (BSA), and have been further developed with the Health and Safety Executive's (HSE) Control of Noise at Work regulations (2021), together with industry-specific requirements and occupational health specialists.

Two-day competency course

Introducing the principles of a hearing conservation programme in the workplace, the two-day competency course provides the knowledge and practical skills required to be proficient in carrying out screening audiometry, evaluation and categorisation of test results.

One-day refresher course

Our one-day audiometry refresher course is a theory and practical course, designed for occupational health professionals who require a general updating of their skills and knowledge to complete screening audiometry in the workplace to the highest standard.

Course content includes:

- Basic acoustics
- Anatomy and physiology
- Physical Agents (noise) Directive
- Factors affecting test accuracy
- Otoscopy
- Techniques of AC audiometry
- Audiogram interpretation
- HSE Categorisation

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD).

Spirometry

Our spirometry courses have been designed to develop theoretical, practical and interpretational skills in order to conduct respiratory testing within an occupational health environment.

We offer refresher level training for both new and existing occupational healthcare professionals within all aspects of spirometry

One-day refresher course

Our one-day occupational spirometry refresher course is the perfect add-on for occupational health professionals who require an annual update or refresher training in all aspects of occupational spirometry measurements and interpretation.

The course is ideal for individuals who have already taken the one-and-a-half-day competency course or currently conduct spirometry in the workplace and are looking to keep up to date with the latest standards and best practice in lung health.

Course content includes:

- Anatomy of the respiratory system
- Spirometry protocols
- Hygiene and infection control
- Calibration requirements and practical session
- Consistency of measurements
- Factors that can cause measurement errors
- Peak flow meters & practical session
- Interpretation and practical session
- Written assessment (competency course only)

Our courses are independently accredited and registered to provide delegates with Continuing Professional Development (CPD).
