

PROPulse®

The new Propulse® G5 Ear Irrigator™ sets new standards in ear irrigation whilst retaining the familiar and trusted features that you and your patients depend upon. It is the culmination of all our many years' experience in the field of ear care.

The new Propulse® G5 Ear Irrigator™ has been ergonomically designed with the user in mind – for instance, the new handle design makes it easier to remove the QrX™ tip. The new unit also incorporates a digital countdown timer with an alarm that helps ensure that decontamination and cleansing are carried out for the optimum time.

- New handle design provides easier tip removal
- Digital countdown cleaning cycle timer
- Hands free operation with footswitch
- Quick-Release handle
- Single-use QrX™ Tips
- Contrapulse® water delivery system
- Trusted Propulse® quality

The Propulse® G5 Ear Irrigator™ still allows easy hands-free operation via the footswitch and includes a rechargeable battery to allow complete portability for domiciliary visits and where the electricity supply may be questionable.

A full range of essential ear care products that complement the Propulse® G5 Ear Irrigator™ are available. They include Propulse® Single Use QrX™ Tips, Propulse® Cleaning Tablets, ProScoop™ Ear Wax Removal Scoop, ProTect™ Shoulder Cape, and Propulse® Head Lamp amongst others.
