swivelling

taylordolman

ropimex®-Telescopic arms, swivelling

You won't trip over anything hanging on the wall.
 This is the best reason for the use of telescopic arms, the screening system which is only there when it is needed. Following use of the screen, simply push together and turn toward the wall. Your room is then restored to its usual appearance.

RTS models in old-age homes and nursing homes.

RTS models in the hospital ...

in the doctor's practice.

Model RTI

ropimex®-Telescopic arms
folding down and swivelling

ropimex®-Telescopic arms, folding down and swivelling

Ideal for intensive care units and locations that do not permit lateral swivelling of the telescopic arms. Following use of the telescopic arms, simply push together and fold down.

RTI models in multi-bed room. Alternating use of the telescopic arms possible from bed to bed.

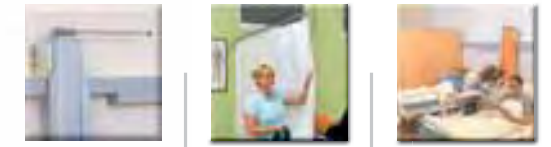

In old-age homes and nursing homes.

RTI models in the intensive care unit.

Model RTH

ropimex®-Telescopic arms with hooks, folding down and swivelling

ropimex®-Telescopic arms with hooks, folding down and swivelling

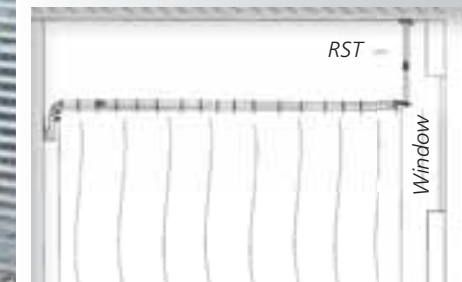

In connection with a height-adjustable ceiling mount RST, the longest telescopic arm RTH 350 can be used to achieve a screening length of 350 cm [140"]. Using the RTH models and the ceiling mounts, you can divide each room as you wish.

Detail: RTH 300 in ceiling mount RST 8.

Screening from wall to wall, maximum length of 350 cm [140"], hook in wall catch (GL).

If the wall catch cannot be installed, e.g. at the window, a ceiling mount is used.

You will find further suggestions in the section ropimex®-Telescopic cubicles (wall and ceiling attachment).

RTH and RST in a multi-bed room.

silver-eloal (S)	Standard design see page 8		Silver-eloal	RAL 7004 Signal grey

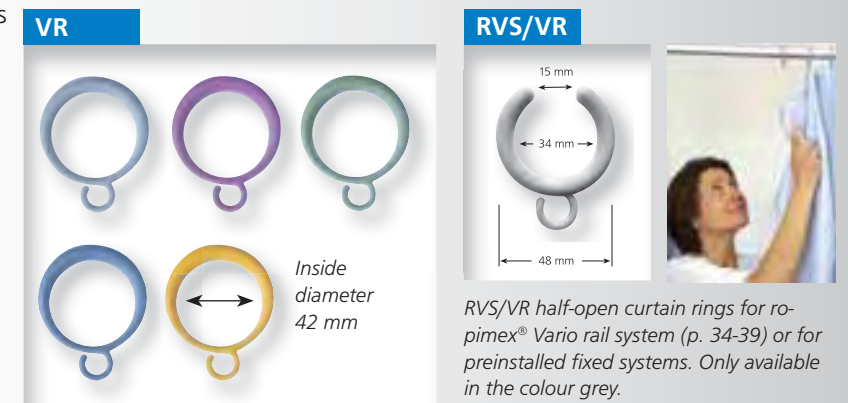

VR

ropimex®-Curtain rings

ropimex®-Curtain rings are always included in the scope of supplies for telescopic arms, telescopic arms with hook and telescopic cubicles.

In case of excessive strain, the curtain rings are released automatically from the eyelets of the curtains. This avoids damage to the system and injuries.

Colours:
grey, lilac, green, blue and yellow

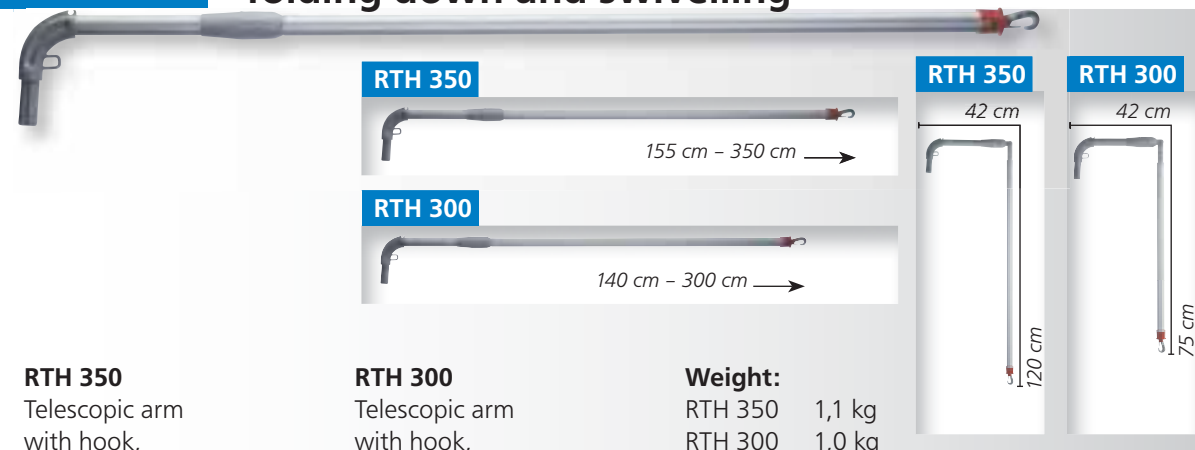

RVS/VR half-open curtain rings for ropimex® Vario rail system (p. 34-39) or for preinstalled fixed systems. Only available in the colour grey.
